SAFETY CODES

RECENT selected **SAFETY CODES (IEC 947.5) (EN 418)** require positive opening of the NC Contacts. Also the EMERGENCY STOP BUTTON latches into the MAINTAINED POSITION as soon as the contacts open.

ADDITIONALLY, certain **Safety Circuits** require redundancy on the NC contact circuit. 2 NC poles required.

* **"FIX"**. Above Emergency Operators per **EN418** with suffix - **"FIX"** are supplied with 2 NC poles. Block Holder to supply
